Yes	No	The following statements are understood to be a part of the pool permit submittal review and field inspection process
		I understand that my pool project will be reviewed per the 2021 International Swimming Pool and Spa Code (ISPSA) with local amendments.
		I understand that my pool project will also be reviewed per the 2021 International Residential Code (IRC) with local amendments.
		I understand that a code compliant pool barrier is required as part of my pool project and that existing and new barriers are subject to review.
		I understand that the code compliant pool barrier is required for all pools, including temporary, seasonal, and storable pools.
		I understand that the pool wall itself (regardless of height) does not provide for a compliant pool barrier without additional features.
		I understand that only 'kiddie pools', which are not capable of holding more than 24" of water, do not require a pool barrier.
		I understand that the pool shall not be filled with water above 24" until I have passed all pool and pool barrier inspections.
		I understand that the pool shall not be used until I have passed all pool and pool barrier inspections.
		I intend to submit an additional fence permit to seek a review and approval for a compliant pool barrier.
		My rear yard already has a code compliant pool barrier, and the following items are in place:
These safety features are in place or will be in place prior to scheduling our inspections.		My existing pool barrier fence is a perimeter fence around the entire rear yard (within 6" of my property lines).
		My existing pool barrier fence is an area fence around the pool and pool equipment.
		My existing pool barrier is part of my elevated deck with minimum 7'-0" H. perimeter fencing/railing (similar to image A).
		My existing pool barrier fence is a minimum of 48" high around the entire perimeter of the fence.
		My existing pool barrier fence has no gaps beneath the fence greater than 2" at grass, mulch, or other non-solid surfaces.
		My existing pool barrier fence has no gaps beneath the fence greater than 4" at solid concrete or paver surfaces.
		My existing pool barrier fence is not less than 3'-0" from any pool equipment, furniture, landscape blocks, etc.
		My existing pool barrier fence has all self-closing / self-latching gates which swing away from the pool.
		My existing pool barrier fence has child-proof safety hardware at 54" or more above the surrounding grade (similar to image B).
		All door(s) from my home into the pool compliant barrier area have an audible chime alert when the door(s) are opened.
		All window(s) with a sill height less than 48" (within the pool compliant barrier area) have an audible chime alert when the windows(s) are opened.
		My pool barrier consists of a chain-link fence with chain-link mesh openings no greater than 1-1/4" (similar to image C).
		I understand that the typical 2-1/4" chain-link mesh does not provide for a code compliant pool barrier.
		My existing pool barrier fence is a picket type fence with picket spaces (between boards or pickets) of less than 4".
		My existing pool barrier has horizontal rails spaced no less than 45" apart
	I understand that the pool ladder must be confined within the pool barrier area, or removed and/or locked to a safety point as required.	
	My ladder will remain in place, but has a lockable safety feature (similar to one of the types pictured in image D).	
		I have contacted my homeowner's insurance policy holder and agree to additional coverages and premiums associated with owning a pool.
		I understand that the pool shall not be used until my homeowner's policy update is in effect.
		I understand that if I answered 'No' to any of the above items that my project may require additional submittals and reviews before it can be approved.
		I understand the above items are subject to field verification by the Village of Schaumburg inspection staff.
		I understand that I am responsible for scheduling all inspections and/or will monitor my contractor for scheduling of all inspections.
